

### **Product Highlights**

- High performance Up to 960/480 Gbps switching capacity and 714/357 Mbps forwarding rate
- Flexible Deployments
   Suitable for both top-of-rack in data centres and
   enterprise network environments
- Easy Management Web-based graphical interface
- Power Saving Features Saves energy and increases the product's lifespan

### **DXS-3600 Series**

# Top-of-Rack 10 Gigabit Managed Switch

### **Key Features**

#### **High performance**

- 960/480 Gbps switching capacity
- 24/8 fixed 10 Gigabit SFP+ ports

#### High availability

- Hot-swappable power modules for power redundancy and load sharing
- Hot-swappable fan trays with airflow control provide cooling redundancy
- Up to 480G stacking<sup>1</sup> bandwidth with four devices functioning together as one

#### Security

- Access Control List
- Port Security
- Traffic Segmentation
- Broadcast/Multicast/Unicast Storm Control
- DoS Attack Prevention
- Advanced Features
- MPLS/OSPF/BGP
- Three Colour Marker Classifying network traffic for QoS

#### Management

- Web-based GUI
- Command Line Interface (CLI)
- RADIUS/TACACS+
- LLDP/LLDP-MED

D-Link's DXS-3600 Series Top-of-Rack 10 Gigabit Stackable<sup>1</sup> Managed Switch consists of compact, high-performance switches that feature 10 Gigabit Ethernet switching, routing, and very low latency. The 1U height and front-to-back air flow make the DXS-3600 Series suitable for and Top-of-Rack data centre, enterprise campus aggregation network environments. The DXS-3600 Series consists of 24-port and 8-port 10 Gigabit SFP+ switches with an expansion module slot. The optional expansion modules not only provide additional 10 Gigabit SFP+ ports but also 120G stacking<sup>1</sup>, 10GBASE-T or 1000BASE-T connectivity for different applications.

### **Convenient deployment**

The DXS-3600 Series switches provide your network with high-performance 10 Gigabit Ethernet switching capacities of up to 960/480 Gbps and forwarding rates of up to 714/357 Mbps. Hot-swappable power modules and fan trays provides the switches with redundancy and high availability. As well as redundancy, loading sharing between the power modules helps to further extend their lifetime. The modular fan design can provide 2+1 redundancy for the system. If a fan fails or the temperature rises, the smart fans will ncrease their speed accordingly to ensure the device continues to operate without downtime.

### **Flexible software**

The DXS-3600 Series can be deployed using one of two different software images. The Standard Image (SI) features a wide range of Layer 2, VLAN, multicasting, Quality of Service (QoS), security, data centre, and static routing functions. The Enhanced Image (EI) features comprehensive IPv4/v6 routing including RIP, VRRP, OSPF, BGP, and L3 multicasting features such as IGMP, MLD, PIM-DM, SM, SDM, SSM, and DVMR. The Enhanced Image (EI) also supports L2/L3 MPLS VPN that enables the DXS-3600 Series switches to be deployed as the core router of an enterprise environment or as an aggregation switch in an MPLS environment.

### Data centre features

Data Centre Bridging (DCB) is an essential set of enhancements to Ethernet for networking in data centre environments. The DXS-3600 Series switches support various core components of Data Centre Bridging (DCB) such as IEEE 802.1Qbb, IEEE 802.1Qaz, and IEEE 802.1Qau; preventing data loss during network congestion, managing the allocation of bandwidth and providing congestion management. The DXS-3600 Series switches also support cut-through switching, which reduces network latency.

### **Energy efficient**

The DXS-3600 Series switches allow users to manage airflow by using different power and fan module sets. Front-to-back airflow optimizes air circulation to provide more effective cooling throughout rack systems in data centres. The switches also feature built-in smart fans; internal heat sensors monitor and detect temperature changes, and react accordingly by utilizing different fan speeds for different temperatures. At lower temperatures, the fans will run slower, reducing the switch's power consumption and noise.

If the worst should happen to your network you need the very best support and fast. Downtime costs your business money. D-Link Assist maximises your uptime by solving technical problems quickly and effectively. Our highly trained technicians are on standby around the clock, ensuring that award-winning support is only a phone call away.

With a choice of three affordable service offerings covering all D-Link business products, you can select the package that suits you best:

#### D-Link Assist Gold - for comprehensive 24-hour support

D-Link Assist Gold is perfect for mission-critical environments where maximum uptime is a high priority. It guarantees four hour around-the-clock response. Cover applies 24/7 for every day of the year including holidays.

#### D-Link Assist Silver - for prompt same-day assistance

D-Link Assist Silver is designed for 'high availability' businesses that require rapid response within regular working hours. It provides a four hour response service Monday to Friday from 8am to 5pm, excluding holidays.

## D-Link Assist Bronze - for guaranteed response on the next business day

D-Link Assist Bronze is a highly cost-effective support solution for less critical environments. Response is guaranteed within eight business hours Monday to Friday from 8am to 5pm, excluding holidays.

D-Link Assist can be purchased together with any D-Link business product. So whether you're buying switching, wireless, storage, security or IP Surveillance equipment from D-Link, your peace of mind is guaranteed. D-Link Assist also offers installation and configuration services to get your new hardware working quickly and correctly.

Technical Specifications		
General	DXS-3600-32S	DXS-3600-16S
Interfaces	24 fixed SFP+ 10G ports with one expansion module	8 fixed SFP+ 10G ports with one expansion module
Console Port	RJ-45 console port for out-of-band management	
Management Port	10/100/1000 Base-T RJ-45 Ethernet for out-of-band remote management	
SD Card Slot	• 1 slot	
Performance	DXS-3600-32S	DXS-3600-16S
Switching Capacity	• 960 Gbps	• 480 Gbps
Max. Forwarding Rate	• 714.28 Mpps	• 357.14 Mpps
Packet Buffer Memory	• 9 MB	
MAC Address Table	• 128K	
Physical	DXS-3600-32S	DXS-3600-16S
Power Input	• 100 to 240 V AC, 50/60 Hz	
Maximum Power Consumption	• 116.8 W (without expansion module)	• 74.3 W (without expansion module)
Standby Power Consumption	• 88.2 W	• 69.9 W
Heat Dissipation (Max.)	• 398.29 BTU/hr (without expansion module)	• 253.36 BTU/hr (without expansion module)
Heat Dissipation (Standby)	• 300.76 BTU/hr	• 238.36 BTU/hr
Dimensions (W x D x H)	• 440 x 506 x 44 mm (17.32 x 19.92 x 1.73 inches)	
Weight	• 10.71 kg (23.6 pounds)	• 9.89 kg (21.8 pounds)
Operating Temperature	• 0 to 45 °C (32 to 113 °F)	
Storage Temperature	<ul> <li>-40 to 70 °C (-40 to 158 °F)</li> </ul>	
Operating Humidity	• 0% to 95% RH	
Storage Humidity	• 0% to 95% RH	
Certifications		
Safety	• CB, cUL, LVD	
EMI/EMC	• FCC, CE, C	-Tick, IC, VCCI

Standard Image (SI)
